DECEMBER - JANUARY 2020 EDITION

Safe this summer

Child Obesity

Bowel Cancer Screening

Eczema treatment

YOUR NEXT APPOINTMENT:

● PRACTICE DOCTORS

Dr Jackie Garden

MBChB, FRACGP, DRANZCOG

Dr Marianne Power

MBChB, FRACGP, PGDipSportMed

Dr Tasneem Sultana

MBBS, DCH

Dr Sean Scanlan

MBBS, Dip MSM (Otago)

Dr Shelton Wabersinke

MBBS

Dr Jim Williams

MBBS, FRACGP, FACRRM, Dip MSM

Dr Anna Eakins

MBBS (London), FRACGP

Dr Joanna Nathan

BM (Soton), FRACGP, MRCP, MRCPG, DCH, DRCOG

Dr Mark Bown

MBChB, MRCPG, FRACGP

Dr John Matson

BPharm(Hons), MBBS, FRACGP

Dr Dominic Radford

MBChB, MRCPG, MSc Sports Med, FFSEM, FRACGP

Dr Tony Malyszczek

FRACGP, MBBS, BE Mech

Dr Karen Gebusion

BsBMS, MB, FRACGP, Dip Derm, DCH

● DIETITIAN

Stephanie Cronin

Accredited Practising Dietitian
B Nutr & Diet

● PRACTICE STAFF

Practice Manager:

Laura Wilkinson

Practice Nurses:

Melanie, Jacqui,

Joanne, Jo

& Ebony

Receptionists:

Helen, Sam, Jennie, Claire, Sarah
& Alannah

SURGERY HOURS

Monday to Friday **8am – 5pm**

Saturday **8am – Noon**

● BILLING ARRANGEMENTS

To maintain and improve the quality of service, we have a policy of private billing. Full payment is required on the day of consultation. Scripts, referrals and follow-up test results may also require payment on the day.

Veterans and WorkCover billing remain unchanged. Some procedures and services attract a separate fee. Contact reception or talk with your doctor for more information.

Payment can be made by cash, credit card or EFTPOS.

● APPOINTMENTS

Consultation is by appointment.

Urgent cases are seen on the day. **Please tell the receptionist should you require a longer appointment i.e.** Complex health problems, counselling, Insurance Medicals and Women's health checks.

An appointment is required for scripts, referrals and follow-up tests.

We kindly request that patients arrive on time.

If you are unable to attend your appointment please contact the practice.

Patients who arrive late may be asked to reschedule.

● MY HEALTH RECORD

My Health Record is an online summary of your key health information. You will automatically get a My Health Record.

When you have a My Health Record, your health information can be viewed securely online, from anywhere, at any time – even if you move or travel interstate. You can access your health information from any computer or device that's connected to the internet. Healthcare providers like doctors, specialists and hospital staff may also be able to see your My Health Record when they need to, including in an accident or emergency.

To find out more go to: <https://www.myhealthrecord.gov.au>

● ON-LINE BOOKING AVAILABLE

To book your next appointment online:

1. Go to www.lkqp.com.au
2. Click on "Book an Appointment"
3. Register to set up a simple account
4. Select your GP and time

OR Download our Mobile Phone App for Apple or Android

1. Download the App by searching "Lake Kawana General Practice" in your App store
2. New users can Register, existing users Log In
3. Click on "Book an Appointment"
4. Select your GP and time

● AFTER HOURS

After hours home visits are available when the practice is closed. Bulk billing is available for our patients.

Phone **13 SICK (13 7425)** for after hours medical care. For more information about the Home Doctor Services please visit their website at:

www.homedoctor.com.au

However, should you require **EMERGENCY** medical attention please ring **000**.

ENJOY THIS FREE NEWSLETTER

Please remember that decisions about medical care should be made in consultation with your health care provider so discuss with your doctor before acting on any of the information.

Keep your child safe while having fun this summer

Summer holidays are a fun time for children but can be a bit stressful for parents. It is a bit easier to get them off screens when it is warm outside. Evidence increasingly shows that helicopter parenting can prevent children from gaining independence yet equally the days of “be home by dark” are long gone. So, what are the key issues to ensure that your child has fun and remains safe.

Children are at risk of dehydration so make sure they are drinking plenty of water, especially when outdoors. Whilst slip, slop, slap should go without saying, it is important to remember sun screen may only last a few hours and needs to be reapplied. Playgrounds today are far safer than in the past but falls can still occur. Age appropriate

supervision and choice of equipment can minimise this. Psychologists point out that allowing some risk taking enables the child to build resilience and also learn their limitations.

Knowing how to swim is important in Australia as is knowing basic water safety swimming is a great activity for children.

Make sure your child swims between the flags at the beach and watch them at all times around water. Fences and gates do not replace vigilance.

Use insect repellent especially at dusk. Insect bites and stings are usually annoying rather than serious but if you have any concerns – see your GP.

Child & Adolescent Obesity

One in four Australian children are overweight or obese. Why? Firstly, children tend to snack on high calorie foods and drinks and second is the replacement of physical activity with time on screens. We can't turn back time but it is not all bad news. There is much you can do as a parent or guardian to help a child get and maintain a healthy weight.

Substitute water for sweet drinks. Eliminating liquid calories reduces calorie intake without leaving a child hungry. Allow soft drinks only on special occasions or no more than once a week. Replace fruit juice with a piece of fruit and a glass of water. This gives them more fibre and fewer calories.

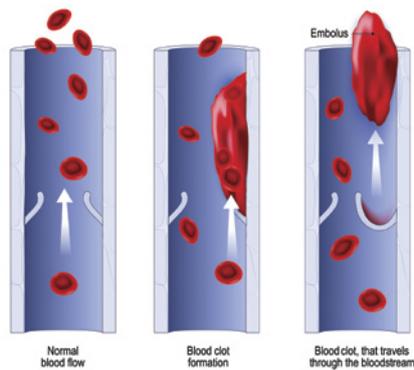

Research shows that we eat more when distracted so ban the screen while eating. And it has also been shown that children who eat at the table with others are 40% less likely to be overweight. This is partly the “screen effect” mentioned before but also it means the child is more likely to be eating a proper meal instead of snack foods.

Teach your children about cooking. Children who get active in the kitchen will eat less junk food and learn about healthy eating.

Limit screen time and get your child active. This can be in an organized sport or a play in the park or back yard. Get a ball or Frisbee and join in as exercise is good for parents too.

Good habits from childhood will serve your child well in adult life.

Deep Vein Thrombosis

A thrombus is a blood clot. The ability of the body to form clots is critical as this stops bleeding when we cut ourselves. However, a blood clot forming in a blood vessel can cause serious problems. A deep vein thrombosis (DVT) occurs when a blood clot forms in the deep veins in the calf. Risk factors include smoking, family history, being overweight, prolonged sitting (e.g. plane travel), and surgical procedures.

Typical symptoms are pain and swelling in the calf. It may be hot or red. There may be pain on flexing the ankles. Diagnosis may be apparent by history and examination. However, usually a doppler study will be ordered to confirm diagnosis and reveal the extent of the thrombus.

Treatment is with anticoagulant medication. This does not remove the existing clot but reduces the risk of it extending or spreading. The length of time of treatment depends on individual circumstances.

The main complication of a DVT is spread to the lungs - pulmonary embolism (PE). This is a serious condition generally needing hospitalisation.

Reduce your risk by maintaining a healthy weight and not smoking. Other preventative measures depend on circumstances. For example, you may be advised anticoagulant medication before an operation together with compression stockings. When flying, stretch your legs frequently and try to avoid crossing them. Taking aspirin has not been shown to reduce the risk of DVT.

Bowel Cancer Screening

With 5375 deaths in 2016, bowel cancer is the second highest cause of cancer death in Australia. Lifelong risk by age 85 is one in 11 for men and one in 16 for women. Risk factors include being over age 50, a positive family history, smoking, excess alcohol consumption, inflammatory bowel disease and obesity.

Early stage bowel cancer has an excellent outlook and as it grows slowly early detection is key. For those with a first degree relative with bowel cancer, colonoscopy is advised starting age 40 and then every five years (or sooner depending on findings). Polyps, if found will be removed. The type of polyp found determines when the next colonoscopy should be done.

The Federal government runs the national bowel cancer screening program. Each citizen is sent a faecal occult blood test (FOBT) kit from age 50. Currently this is four yearly till 58 and then two yearly to age 74. From 2020 this will be every two years till age 74.

The kit is easy to use and a result is sent to your nominated GP. A positive result is not a diagnosis of cancer (blood may be in the stool for various other reasons including benign polyps and haemorrhoids) but is an indication to proceed to colonoscopy.

Diagnosis of bowel cancer is through biopsies taken on colonoscopy. The most important message is that bowel cancer is treatable if detected early and screening can allow early detection. Don't ignore your kit in the mail and talk to your GP.

Eczema – Prevention & Treatment

Eczema is a red itchy rash, which often starts in infancy or early childhood.

The commonest places are the face, neck and "flexures" which are the skin creases at the knees and elbows. It can be a few scattered areas or may be widespread. It ranges from the mild to the severe and may weep or be crusty.

Mainstays of treatment are moisturizers and steroid based creams

Avoiding known triggers can reduce the frequency and severity of episodes. Unfortunately, it is not always possible.

Dust mite allergy can worsen existing eczema. Contact occurs via bedding, carpet or soft furnishings. Shake sheets daily to remove skin scales (the food of dust mites!). Change sheets twice-a-week after a hot water wash. Put a

special dust mite cover on the mattress.

Soaps and detergents remove natural skin oils and worsen dryness and itch. Wash with aqueous cream. Showers are better than baths. Reverse dry skin by frequent application of a simple moisturizer.

Avoid wool and synthetic fabrics and wear cotton.

Both cold and heat can worsen itch.

Both natural foods and food additives can worsen eczema in some children. Unfortunately, skin or blood testing for food allergies is not accurate in uncovering which foods. Instead, strict avoidance of a food (two to three weeks) followed by a deliberate

 <https://www.allergy.org.au/patients/skin-allergy/eczema>

challenge with the food (three serves a day for four days) will usually highlight any food allergies. Common ones are dairy, soy, fish, eggs, wheat, citrus, yeast extract or nuts.

● PRACTICE NOTES

Telephoning your doctor: While most problems are best dealt with in consultation, a doctor will always be available during normal surgery hours for emergency advice. Our staff are experienced in helping you decide whether the matter requires an appointment, a return phone call from the practice, or urgent advice.

Specialist Appointments: Sometimes the doctor will recommend that you attend a specialist to obtain his/her opinion about your condition. It is extremely important that you attend the specialist appointment. If you cannot attend or are having difficulty obtaining an appointment, please contact the reception staff at this practice on **5493 3800**. It is also of the utmost importance that you return to your doctor after the specialist's appointment if requested to, so that the doctor can ensure any follow-up care is provided.

Privacy Legislation: Lake Kawana General Practice follows the policies set down by Privacy Legislation with respect to your personal health information. Please see notice in waiting room or speak to the receptionists.

Health Promotion: This practice actively participates in health promotion and disease prevention strategies.

If you do not wish to receive reminders when certain tests or check-ups are due please let the nurse or receptionist know.

Home Visits: For patients too sick or incapacitated to attend the surgery, their doctor may be able to attend to them with a home visit. Unless it is an emergency, the doctor will visit in their lunch break or at the end of their consulting day. A separate fee applies for home visits.

Your comments on our medical services are always welcome. Please feel free to talk to your doctor, Practice Manager or receptionist, write or use our suggestion box. We take your concerns or suggestions seriously. If you wish to discuss the matter outside the surgery you can contact the Office of the Health Ombudsman on: 133 OHO (133 646).

BARBECUED PRAWN WITH GINGER AND MANGO MAYONNAISE

Ingredients

- 3kg green tiger prawns, tail intact
- 1 stalk lemongrass, white part only
- 3 kaffir lime leaves, shredded
- 2 tblspn peanut oil

Mayonnaise

- 1 mango, peeled and stoned
- 1 tblspn finely grated fresh ginger
- 1 tblspn lime juice
- 2 egg yolks
- 1 tspn mustard powder, or horseradish cream
- 250ml light olive oil

Method

1. Marinate the prawns with the lemongrass, lime leaves and peanut oil in the fridge for at least 1.5 hours
2. For the mayonnaise, place mango flesh, ginger, lime juice and mustard powder in a food processor and process until smooth. With motor running, add oil in a thin, steady stream until mixture is thick and pale. You may not need all the oil. Taste and season with salt and pepper.
3. Preheat barbecue to high. Add prawns and cook until prawns curl and change colour.
4. Transfer prawns to a serving plate with mayonnaise and garnish with baby cos lettuce leaves that can be used as wraps.
